

Prusti Hadvani

Software Engineer | Golang & Full Stack | Ahmedabad, India

+91-97732 32731 | prustihadvani60@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

Full Stack Software Engineer with about two years of experience building production Golang backends and React/Next.js frontends for telemetry and IoT systems. Skilled in secure REST APIs (JWT, X.509) and low-latency real-time pipelines (MQTT, WebSockets, SSE), with a focus on clean architecture and testability.

Experience

Midaas Telesoft Pvt. Ltd.

Dec 2024 – Sep 2026

Software Engineer

Ahmedabad, India

- Own end-to-end features for a telemetry/IoT platform, from Golang services and MQTT data ingestion to React/Next.js dashboards, shipping features used by multiple customer deployments to live production systems.
- Designed and built high-performance Golang REST APIs (Gorilla Mux) in live production, with consistent validation, error handling, and auth/logging middleware.
- Built low-latency real-time pipelines using MQTT, WebSockets, and SSE to stream live device data to distributed clients, so dashboards update instantly without polling.
- Implemented JWT access/refresh authentication and secured service-to-service communication with X.509 certificates.
- Applied Onion Architecture and the Observer pattern so modules stay independently testable and easy to extend with new features and device types.
- Wrote unit and integration tests in Go, raising coverage to 85% and reducing regressions between releases.

Midaas Telesoft Pvt. Ltd.

May 2024 – Nov 2024

Software Engineer Intern

Ahmedabad, India

- Built Golang REST APIs and real-time WebSocket updates for production services; promoted to full-time Software Engineer after the internship.
- Helped adopt clean architecture and the Observer pattern in production codebases.
- Built responsive React/TypeScript features (Tailwind CSS, Chakra UI); worked with PostgreSQL and MySQL in Docker.

Projects

Employee Management System | *Golang, PostgreSQL, Next.js, WebSockets, Docker*

[GitHub](#)

- Architected a full-stack system with real-time synchronization across multiple clients using WebSockets, so one user's changes appear instantly for everyone.
- Built RESTful APIs following clean architecture, with a Dockerized setup so the whole stack runs with a single `docker compose up`.

Technical Skills

Languages: Golang, TypeScript, JavaScript, Python

Backend: REST APIs, Gorilla Mux, Clean/Onion Architecture, Observer Pattern

Real-Time & IoT: MQTT, WebSockets, Server-Sent Events (SSE)

Security: JWT (Access & Refresh Tokens), X.509 Certificates

Frontend: React.js, Next.js, Redux, Tailwind CSS, Elastic UI, Chakra UI, Shadcn UI

Databases: PostgreSQL, SQLite, MySQL

Testing: Go Testing, Vitest, Cypress, React Testing Library

DevOps/Infra: Docker, Kubernetes, CI/CD, Git

Tools: Jira, Postman

Education

College of Computer Science and Information Technology

Junagadh

Bachelor of Computer Application

Aug 2021 – Jul 2024

- CGPA: 9.10 / 10

Shree G.D. Vachhani Kanya Vidhyalay

Keshod

Higher Secondary (Commerce)

Jun 2019 – Mar 2021
